1B-1	<p>There are many different ways that people can use to delay or avoid pregnancy. I will mention some of them and show you pictures. There are injections you can get, like Depo, to stop pregnancy for one or three months. There are implants like Implanon and Jadelle that your doctor or nurse can put into your arm and that will prevent pregnancy for one or more years. There is also the IUD which is a loop or coil that the doctor places inside you to prevent pregnancy. There are pills you take everyday to prevent pregnancy like Femiplan and Microgynon. There are also one-time pills that you take in an emergency after having sex, like Postinor. There are condoms that a male partner puts on before sex. There are also condoms for females. There are many other methods besides these, including ones that are natural like when men can be careful and pull out during sex before climax.</p> <p>Have you or your partner ever used any methods to delay or avoid pregnancy?</p>	<p>Yes</p> <p>No</p> <p>Don't know</p> <p>No response</p>	<p>1</p> <p>0</p> <p>88</p> <p>99</p>	Skip to section E to end the interview

SECTION 7. SATISFACTION WITH SERVICE AND WITH PROVIDER DURING LAST OUTLET VISIT

Now, I would like to ask you questions about the last time you went to get a family planning method or service. You may not know or not remember answers to some of the questions I will ask you and this is OK. You can tell me when you don't know or don't remember the information that I am asking about. You can also tell me when you don't feel comfortable answering any question.

SurveyCTO Programming: this section and the subsequent sections (8-10) are for respondents who have used FP in the last 12 months, and specifically, have used only modern FP methods which require a visit to a facility or CHW. Exclude those who have used/ are using methods which can't be obtained from a facility/CHW (i.e., lactational amenorrhea, Calendar method/ rhythm, withdrawal, and other traditional methods) and route them to Section 11.

SECTION 8. COST OF METHOD/SERVICES RECEIVED AT LAST OUTLET VISIT

Now, I will ask you about the costs related to getting your [CURRENT METHOD /PREVIOUS METHOD] the last time you obtained a supply of the method. Again, it is OK if you don't remember all the information I am asking you about. You can just tell me that you don't know.

SurveyCTO Programming: this entire section is for respondents who have used FP in the last 12 months, including female sterilization. This is relevant only for those who have used modern FP methods which require a visit to a facility or CHW. Exclude those who have used/ are using methods which cant be obtained from a facility/CHW such as lactational amenorrhea, Calendar method/ rhythm, Withdrawal, and other methods that are traditional.

Q. No.	Question	Responses	Response codes	Skip
801	The last time you obtained your [CURRENT METHOD/ PREVIOUS METHOD], did you have to pay anything out of pocket to the [facility/CHW]? <i>[Interviewer: if the respondent obtained product from a different place than where she received service (e.g., in case of injections and insertions), then enter yes if she paid at either place]</i>	Yes	1	Skip to 808

802	Were there separate fees charged by the [facility/CHW] for the service and for your method? PROBE: Service fees include fees you have to pay in order to be seen by the provider for consultation even if you don't end up getting a method of FP. Product fees include fees for the FP method and any supplies and consumables needed to provide the method, for example, the cost of the injectable and the syringe needed to give you the injection. <i>[Interviewer: Even if the respondent obtained a method that is not an injection, insertion, or sterilization, this question is still applicable because consultation or counselling could have happened. Select "no" if no separate fee was paid for consultation/counselling.</i> <i>if respondent obtained method from one place and took it to another place for service, then ask her whether she paid a fee at each outlet and enter "yes" if she did.]</i>	Yes	1	Skip to 805

SECTION 9: MATCHING PRIOR FP USE WITH SURVEYED OUTLETS; FACTORS AFFECTING OUTLET CHOICE

SurveyCTO Programming: this entire section is for respondents who have used FP in the last 12 months, including female sterilization. Update as of May 21: For all searches below, limit the search options to the county in which the interview is taking place. It is not necessary to give the enumerator the option to change the county being used to limit search results; those questions can be removed.

Now, I will ask you questions that will help me identify with specific facility you visited or CHW you saw the last time that you got a new supply of your FP method. I will also ask about other facilities near you. The questions being asked are meant to help us learn more about the FP products and services that the facilities provide and about your relationship with these facilities. You don't have to be concerned about giving me information about the facilities because the information is used only for our study and not used for monitoring the facilities. Also, the facilities will not have a way of finding out what you tell us about them.
